

OnePointHealth presents

Musculoskeletal Medicine For The GP

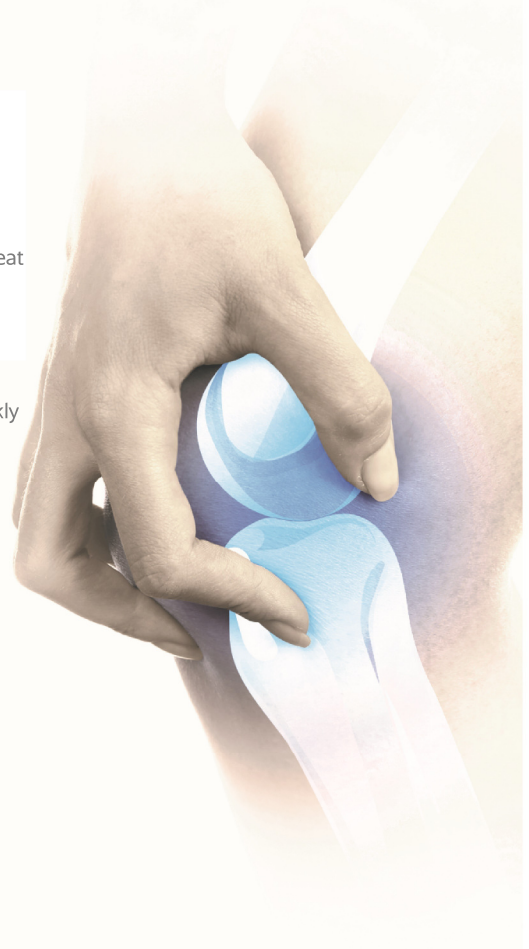

MODULE 1: TENDON AND FASCIA INJURIES OF THE LOWER LIMB

This module covers the current concepts in conservative and invasive interventions of tendon and fascia injuries. Learn how to assess, diagnose and treat tendinopathy and fascia conditions of the lower limb.

Gain the upper hand on common lower limb injuries such as plantar fasciitis and Achilles tendinopathy. Find out the key questions to ask and how to assess quickly and accurately, whilst gaining the latest tips and tricks on effective treatment. Hear from our panel of surgeons as to when a specialist opinion is needed.

PROGRAM

- 6.15pm Registration
- 6.30pm Specialist panel topic presentation and discussion
- Active Learning Modules (ALM) Group Breakout**
- 7.00pm ALM 1: Taking a history, physical assessment and diagnosing
